

FRATERNITY AND SORORITY LIFE TIERED VIOLENCE PREVENTION EDUCATION PLAN

To improve educational quality for FSL members, WRAC (Women's Resource and Action Center), RVAP (Rape Victim Advocacy Program), and FSL (Fraternity and Sorority Life) have collaborated to implement a new educational system for violence prevention education.

Every member of an FSL organization is required to attend one facilitated, interactive workshop each year of their membership. Workshops are designed to scale and build upon previous education. This is in addition to other education FSL students receive including new member academy and alcohol harm reduction.

Educational participation is tracked by student to ensure each member builds skills and has the same knowledge base. During their first year of membership, each student must complete Tier 1 and during their second year they must complete Tier 2. During years three and four of membership, students must complete Tier 3 and 4, where they have the choice of participating in three workshops. These tiers are focused on increasing leadership in these areas. Tier topics are outlined below.

Tier 1-Enthusiastic Consent

- Participants learn what consent is, how to set and communicate boundaries and how to respond respectfully to rejection.

Tier 2-Dismantling Rape Culture

- Participants learn what rape culture is, how to recognize it in our everyday interactions and how to actively dismantle it.

Tiers 3 & 4-Healthy Relationships

- Participants learn how culture influences perceptions of relationships, to recognize unhealthy warning signs, and to actively build skills to engage in healthy relationships

Tiers 3 & 4-Bystander Intervention for Preventing Sexual Violence

- Participants learn to recognize warning signs for sexual violence, bystander intervention skills and how to apply those skills to real world scenarios.

Tiers 3 & 4-Bystander Intervention Creating Safer Communities

- Participants learn to recognize warning signs for identity-based harm, bystander intervention skills and how to apply those skills to real world scenarios.
